

TASK 2

Foundation Website Improvement Analysis

A live-content and design-based UX audit of inamigosfoundation.org.in

Suggested Homepage Redesign

High-level visual concept - not a production UI

Submitted by

Arpit Mishra

Role

AI Web Development Intern

Organization

InAmigos Foundation

Date

1 August 2026

1. Executive Summary

Overall assessment

The website communicates the foundation's social mission and contains useful pages for causes, volunteering, gallery, blog and contact. The largest opportunities are clearer calls to action, stronger trust signals, more structured storytelling, consistent contact information and improved mobile/accessibility details.

This report combines a genuine homepage browser capture, current-page evidence frames for the About, Gallery/Blog and Contact pages, and annotated design mockups. The official pages were rechecked on 1 August 2026. The evidence frames preserve the current page URLs and visible content used in the analysis; the conceptual mockups then demonstrate the recommended improvements.

Area	Current assessment	Main gap	Target
Visual hierarchy	Good foundation	Important actions compete with navigation	Clear primary CTA
Content clarity	Moderate	Long text and limited visual storytelling	Scannable sections
Trust & credibility	Moderate	Credentials need stronger presentation and verification	Visible proof and impact dates
User experience	Moderate	Contact and gallery journeys can be easier	Fewer clicks, clearer feedback
Consistency	Needs attention	CTA wording and contact emails vary	One design/content system
Accessibility	Needs validation	Keyboard, contrast, labels and alt text require audit	WCAG-aware experience

2. What the Task Requires

1. **Review the live website:** Open the homepage and important inner pages on desktop and mobile.
2. **Mark improvement areas:** Use numbered boxes, arrows or comments to show each problem clearly.
3. **Explain the solution:** For every issue, state why it matters and what should replace or improve it.

4. **Compile the evidence:** Place visuals and recommendations in a Word document or PDF.
5. **Submit and share:** Upload all source files to Drive, publish a LinkedIn post, tag InAmigos Foundation and save a screenshot of the post.

3. Analysis Method

- Navigation and information architecture
- Homepage message and calls to action
- Readability and content hierarchy
- Trust signals and impact proof
- Gallery and blog discoverability
- Contact and conversion experience
- Mobile responsiveness and accessibility
- Consistency of labels, email addresses and visual components

4. Live Website Evidence

Evidence status

The homepage visual below is a genuine browser capture dated 26 June 2026 and was rechecked against the live page content on 1 August 2026. The About, Gallery/Blog and Contact visuals are current-page evidence frames generated from the official page URLs and content retrieved on 1 August 2026. They are clearly separated from the conceptual redesign mockups that follow.

About Us
Home / Page

Replace the generic breadcrumb "Home / Page" with "Home / About Us".

About Us - InAmigos Foundation

InAmigos Foundation, founded on September 23, 2020 by Mr. Govind Shukla, is a Section 8 registered non-profit organization committed to creating lasting social impact. With its base in Chhatrapati, the foundation operates across India through professionals and volunteers.

Our Credentials & Recognitions

- ✓ Registered under Section 8 - Licensed by Central Government
- ✓ 80G & 12A Certified
- ✓ CSR-1 Registered
- ✓ NITI Aayog Registered
- ✓ IAF ISO 9001:2015 Certified

Show registration numbers or downloadable proof beside each certification claim.

Split the long introduction into Mission, Vision, Values and History sections.

Live Evidence 2. About Us page content evidence with annotations.

Gallery and Blog - Current Page Evidence

Evidence capture based on current official-page content retrieved 1 Aug 2026

The screenshot displays the INAMIGOS Foundation website. The top navigation bar includes links for Home, Causes, About Us, Volunteers, Gallery, Blog, Events, and Contact. The main content area is split into two columns: Gallery on the left and Blog on the right.

Gallery Page:

- The header shows "23 Entries, 10 Entries per Page" (Annotation 1).
- Below the header are four placeholder images labeled "Gallery image" and "Limited visible context" (Annotation 2).

Blog Page:

- The header shows "Home / Blog".
- Three blog entries are visible:
 - Project Vikas: Transformi...** (01 Mar 2025, 0 | 7,324)
 - Mission Life: Great Visio...** (30 Jan 2025, 0 | 2,751) (Annotation 3)
 - Save Water, Save Life: A ...** (30 Jan 2025, 0 | 4,091)

Annotations:

- 1:** Replace technical entry-count text with useful filters for project, year and location.
- 2:** Add captions, dates, locations and project names to gallery items.
- 3:** Show full two-line titles and remove "0 comments" when comments are inactive.

Live Evidence 3. Gallery and Blog page content evidence with annotations.

Annotations:

- 1: Footer contact: inamigosfoundation@gmail.com (Inconsistent with header and page contact email)
- 2: Email field in the message form (Needs validation, success/error feedback, privacy text, and expected response time)
- 3: Email field in the 'Get in touch' section (Needs Google Maps, 'Get Directions', click-to-call, and WhatsApp actions)

Live Evidence 4. Contact page content evidence with annotations.

5. Annotated Design Analysis

Figure 1. Homepage audit with numbered improvement areas.

1

Improve donation wording and prominence

Observation: The phrase “Donate Us” is less natural and less action-oriented than standard donation language.

Recommendation: Use “Donate Now” consistently in the header, hero and footer. Apply one distinct accent colour and maintain adequate contrast.

Priority: High | Effort: Low

2

Simplify the primary navigation

Observation: A large number of equal-weight navigation choices can slow decision-making, especially on smaller screens.

Recommendation: Group related sections under “What We Do” or “Explore”; retain only the most important top-level links.

Priority: Medium | Effort: Medium

3

Lead with verified impact

Observation: The mission is clear, but users need immediate evidence that their time or donation creates results.

Recommendation: Place 3–4 dated impact metrics near the hero. Add a link to a transparent impact report or project page.

Priority: High | Effort: Medium

4

Standardize calls to action

Observation: Different wording for the same action makes the experience feel less consistent.

Recommendation: Create a CTA system: “Donate Now”, “Become a Volunteer”, “Partner With Us” and “Read the Story”.

Priority: High | Effort: Low

About Us Page Audit

Content and trust-building recommendations

The diagram illustrates an audit of the InAmigos Foundation's 'About Us' page. It features a header with the InAmigos logo and the page title 'About Us'. Below the header, the main content area is divided into two columns. The left column contains the title 'About Us - InAmigos Foundation' followed by a paragraph about the foundation's mission and a section titled 'Our Credentials & Recognitions' listing various certifications. The right column contains a section titled 'Founder / Team' with a placeholder for a photo. Four numbered callouts provide specific recommendations: 1 points to the breadcrumb 'Home / Page' and suggests replacing it with 'Home / About Us'; 2 points to the main paragraph and suggests breaking it into mission, vision, values, and impact sections; 3 points to the 'Founder / Team' section and suggests adding authentic photos, roles, and a timeline; 4 points to the 'Our Credentials & Recognitions' section and suggests turning certifications into verified badges with links or downloadable proof.

InAmigos **About Us**

About Us
Home / Page

Replace the generic “Home / Page” breadcrumb with “Home / About Us”.

Break long paragraphs into mission, vision, values and impact sections.

About Us - InAmigos Foundation

InAmigos Foundation, founded on September 23, 2020, is a Section 8 registered non-profit organization committed to creating lasting social impact. With its base in Chhattisgarh, the foundation operates across India through professionals and volunteers.

Our Credentials & Recognitions
✓ Section 8 registered ✓ 80G & 12A ✓ CSR-1 ✓ NITI Aayog ✓ ISO 9001:2015

Turn certifications into verified badges with links or downloadable proof.

Founder / Team

Add authentic founder/team photos, roles and a short organizational timeline.

Figure 2. About page content and credibility improvements.

5

Correct generic breadcrumbs

Observation: The About page search representation includes the generic breadcrumb

“Home / Page”, which gives weak context.

Recommendation: Use meaningful page-specific breadcrumbs such as “Home / About Us” and structured breadcrumb metadata.

Priority: Medium | Effort: Low

6

Make the About page scannable

Observation: Long paragraphs and credential lists are harder to read quickly.

Recommendation: Split content into Mission, Vision, Values, History, Leadership, Registrations and Annual Impact.

Priority: High | Effort: Medium

7

Add authentic people and history

Observation: A non-profit gains trust when visitors can see the people responsible for its work and how the organization evolved.

Recommendation: Include founder and leadership photos, short bios, governance roles and a timeline from 2020 to the present.

Priority: High | Effort: Medium

8

Present credentials as verifiable proof

Observation: Text-only certification claims can be overlooked or misunderstood.

Recommendation: Use accessible certificate badges linked to official documents, with registration numbers and last-verified dates.

Priority: High | Effort: Medium

Gallery and Blog Audit

Improve discoverability, context and visual consistency

Figure 3. Gallery and blog organization recommendations.

9

Organize the gallery around stories

Observation: A raw entry count and basic pagination do not help visitors understand the work shown.

Recommendation: Add filters for project, year and location. Give every image a caption, date, place and outcome.

Priority: Medium | Effort: Medium

10

Improve media presentation

Observation: Mixed image ratios or missing context can make a gallery feel inconsistent.

Recommendation: Use consistent thumbnails, lazy loading, a lightbox, descriptive alt text and compressed WebP/AVIF images.

Priority: High | Effort: Medium

11

Strengthen blog cards

Observation: Truncated titles and "0 Comments" metadata reduce clarity and can add unnecessary noise.

Recommendation: Use two-line titles, meaningful excerpts, topic tags and a visible “Read article” link; hide inactive comment counts.

Priority: Medium | Effort: Low

12

Create content pathways

Observation: Blog posts should guide visitors toward the next useful action.

Recommendation: End each article with related projects, volunteer opportunities, donation options and social sharing.

Priority: Medium | Effort: Medium

Contact Page Audit

Make contacting and visiting the foundation easier

Your Message

Submit **2**

Embed Google Maps and include a “Get Directions” link.

Add validation, privacy note and expected response time.

Add WhatsApp and call actions; show success/error feedback after submission.

Footer contact: inamigosfoundation@gmail.com **3**
Header/page contact: support@inamigosfoundation.org.in

Use one official email consistently throughout the website.

Figure 4. Contact form, location and consistency improvements.

13

Resolve email inconsistency

Observation: Search-visible page content shows support@inamigosfoundation.org.in in some areas and inamigosfoundation@gmail.com in footers.

Recommendation: Choose one official support email and use it consistently across the header, contact page, footer and structured data.

Priority: High | Effort: Low

14

Add map and quick-contact options

Observation: The contact page provides address, phone, email and a form, but direct visit/contact tools can be more convenient.

Recommendation: Embed a map, add “Get Directions”, click-to-call and WhatsApp actions, and state response hours.

Priority: High | Effort: Medium

15

Improve form feedback and privacy

Observation: A form should tell users whether fields are valid, whether submission succeeded and how their information will be used.

Recommendation: Add inline validation, accessible labels, success/error states, spam protection and a short privacy statement.

Priority: High | Effort: Medium

6. Suggested Homepage Direction

Figure 5. Suggested homepage redesign concept with simplified navigation and impact-led storytelling.

The redesign concept prioritizes three questions every first-time visitor has: **What does the foundation do? What impact has it achieved? How can I participate?**

7. Prioritized Improvement Plan

Priority	Action	Expected benefit	Effort	Suggested timing
P1	Unify “Donate Now” wording and official email	Higher trust and fewer user doubts	Low	Week 1
P1	Verify navigation links and mobile menu	Removes dead ends	Medium	Week 1
P1	Add contact validation, map and WhatsApp/call links	More enquiries and easier access	Medium	Week 1–2
P2	Restructure About page; add team and timeline	Stronger credibility	Medium	Week 2
P2	Add dated impact metrics and proof links	Improved donor confidence	Medium	Week 2–3
P2	Improve gallery filters, captions and image optimization	Better storytelling and speed	Medium	Week 3
P3	Standardize blog cards and article CTAs	More content engagement	Low	Week 3
P3	Run accessibility and performance audits	More inclusive, faster experience	Medium	Ongoing

8. Mobile and Accessibility Checklist

☐ Navigation menu opens, closes and works using keyboard controls.

- ☐ Buttons and links have a minimum comfortable touch area and visible focus state.
- ☐ Body text remains readable without zooming; headings follow a logical H1–H3 order.
- ☐ Colour contrast is sufficient for text, buttons and form errors.
- ☐ Every meaningful image has descriptive alt text; decorative images use empty alt text.
- ☐ Forms have visible labels, error messages and status announcements for screen readers.
- ☐ Images are compressed and lazy-loaded; layout shift is minimized.
- ☐ Pages are tested at 360 px, 390 px, 768 px, 1024 px and desktop widths.
